

Email SPAM/Virus Filtering

CyberLynk, a leader in the Internet Service industry maintains a wired and wireless network to provide high-speed, commercial grade Internet service to businesses in SE Wisconsin and NE Illinois. CyberLynk can now filter your email for spam and viruses.

CyberLynk's spam/virus filtering service operates automatically to filter out unsolicited "junk" email from each users mailbox, protecting your employees from unwanted distractions and interruptions. With the ever increasing amount of unsolicited email or "spam" arriving daily, protection from spam and viruses is an important means of saving time and staying focused on the important work at hand.

CyberLynks time-tested and proven filtering solution consistently provides the highest capture rates in the industry. CyberLynks rules based analysis of each email provides a 94.8% capture rate.

How It Works

CyberLynks spam/virus filtering service is unlike other solutions that have to be installed on your local desktop or server to filter email. CyberLynks service is positioned between the Internet and your corporate network.

All incoming email is routed through CyberLynks secure data center and scanned by our spam/virus filtering servers. Each email is scanned and filtered using a very complex set of filters that look at the message content as well as where/who the email was sent from. These processes are done in an automated environment that prevents anyone from viewing or intercepting valid email.

Cyberlynks spam/virus filtering service is compatible with any email system/server and does not require additional hardware or software.

CyberLynks engineers constantly monitor evolving spammer tactics to ensure customers have the most accurate and effective spam/virus filtering possible. All of CyberLynks spam/virus filters are updated on an hourly basis to ensure accurate results.

Reseller Packages

The CyberLynk Reseller Program allows you to purchase a primary account and then add additional domains at an incredible discount. You can resell the spam/virus filtering, setting whatever price for them you choose. The Reseller Program is perfect for webmasters who want to boost revenue as they design sites or entrepreneurs who want to start their own company to serve businesses.
